HEALTH INNOVATION CAMPUS BOXMEER
Powered by NECRON GROUP

THE FUTURE OF HEALTH

Healthcare is under pressure due to rising costs, an ageing population, and a shortage of healthcare professionals. Technological innovations, such as robotics and AI, present opportunities to permanently transform the healthcare landscape. And the focus on prevention and healthy nutrition is becoming increasingly important. But breakthroughs in healthcare require a strong network. With the establishment of such a network at the Health Innovation Campus Boxmeer, this campus will become the incubator where healthcare innovations are conceived, tested, and applied.

SHAPING FUTURE HEALTHCARE

Why choose Health Innovation Campus Boxmeer?

Gateway to expertise and talent

Access to talent and expertise to realise your ambitions. With connections to a leading network of Life Science & Health knowledge institutions and agri, food, tech, and health companies, that is precisely what establishing at Health Innovation Campus Boxmeer offers. Collaboration with regional universities of applied sciences, vocational colleges, and the on-campus hospital Maasziekenhuis Pantein ensures a continuous flow of knowledge, qualified professionals, and talent. Companies already based in the region will find the campus to be a strategic extension of their network, where they can contribute to and benefit from collaboration in healthcare and health innovation.

Room to grow

200,000 square metres of space in a green environment provide ample room for customisable offices, modern laboratories, healthcare institutions, and shared research and workspaces. This facilitates growth ambitions and enables a rapid response to market changes.

The dual-branded Marriott International hotel offers hotel rooms and short stay accommodations, a modern conference centre, a bar, and a restaurant, providing a space for meetings, relaxation, and knowledge exchange.

Working green, living healthy

Working on campus means choosing sustainability, with energy-efficient buildings and a green environment that promotes employee well-being.

Ecosystem of innovation

At Health Innovation Campus Boxmeer, you will have the opportunity to collaborate within a dynamic ecosystem with other leading Life Sciences & Health organisations that aim to shape the future of healthcare and healthy nutrition. With the resulting synergy and a focus on prevention and the use of innovative technologies such as AI and robotics, Health Innovation Campus Boxmeer aims to become the centre of healthcare innovation in Europe.

Strategically connected

With the establishment of the Health Innovation Campus, Boxmeer becomes the connecting link between healthcare innovation centres in the Netherlands, Belgium, and Germany. This role as a centre for international cooperation in medtech, AI, and biotechnology creates limitless opportunities.

Boxmeer is shaping the future of healthcare. Enable your organisation to thrive through collaboration, innovation, and space to expand.
