KNOWLEDGE INSTITUTIONS

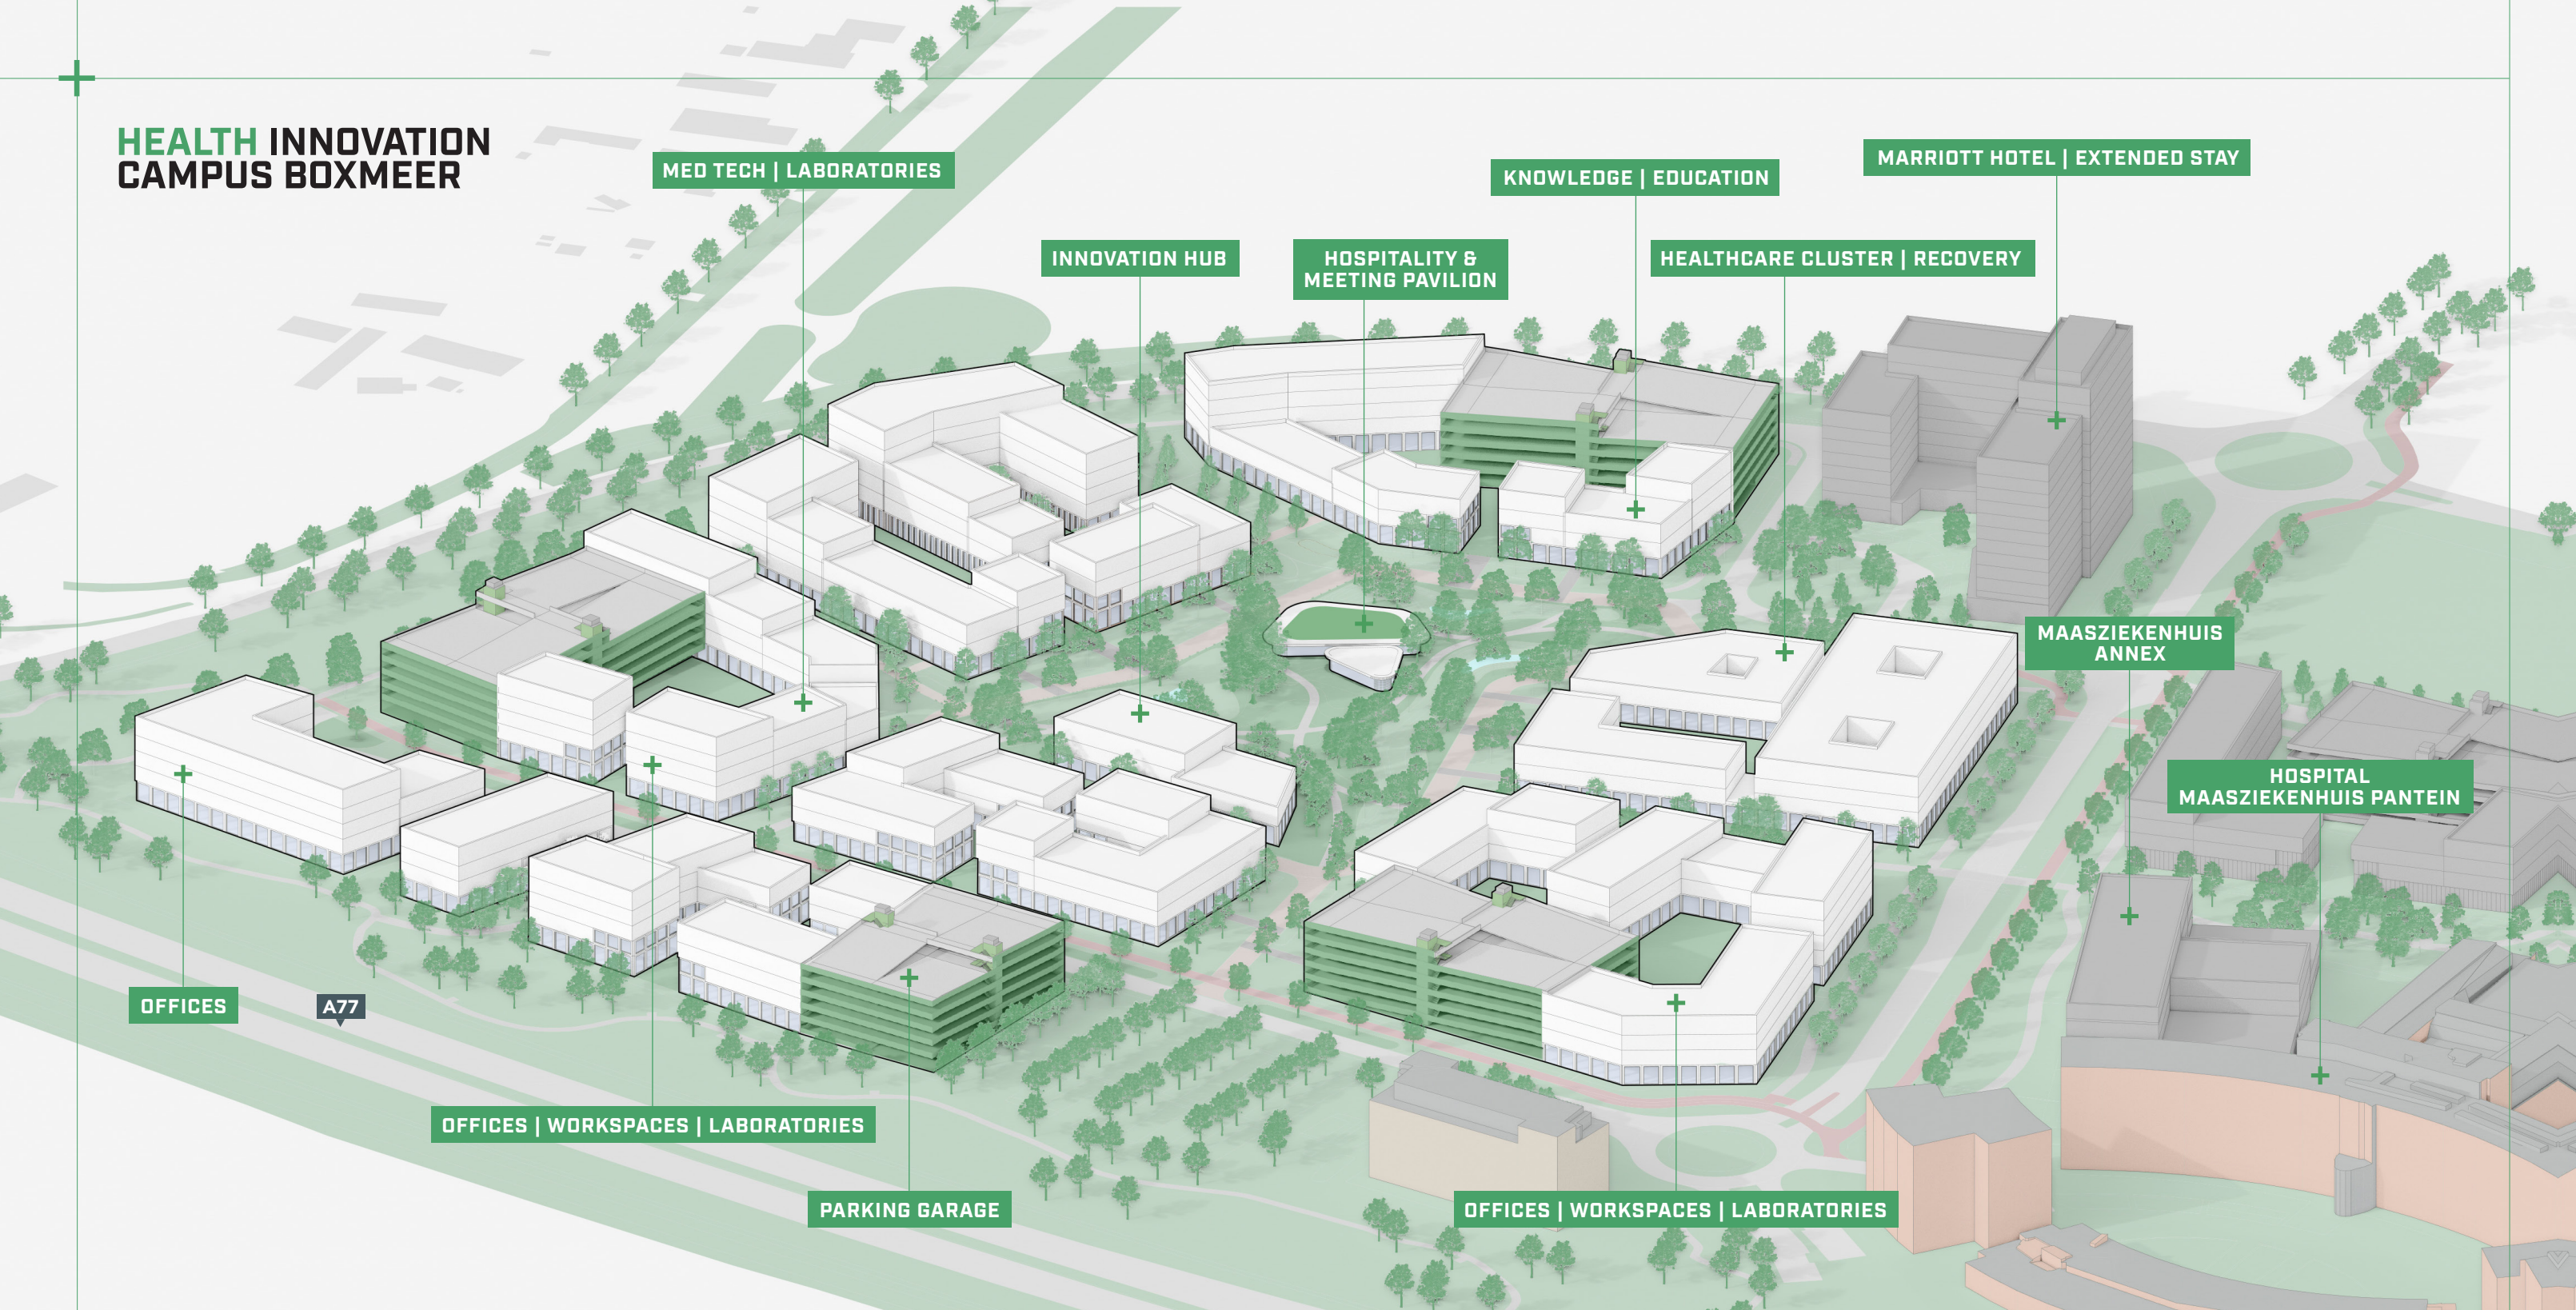

Smart innovation, sustainable growth

The future of healthcare is shaped at Health Innovation Campus Boxmeer. Here, we unite knowledge institutes, companies, and healthcare institutions to address significant global health challenges. By integrating knowledge, technology, and practical experience, we create groundbreaking solutions with tangible impact.

SHAPING FUTURE HEALTHCARE

HEALTH INNOVATION
CAMPUS BOXMEER

Why choose Health Innovation Campus Boxmeer?

Innovation in healthcare starts here

At Health Innovation Campus Boxmeer (HICB), knowledge institutions collaborate directly with healthcare providers and innovative companies to solve pressing healthcare issues. Ideas are rapidly tested and implemented through a network connecting research directly with clinical practice. From healthcare AI to medical technology and nutrition: Health Innovation Campus Boxmeer provides the environment, network, and resources needed to accelerate healthcare innovation from lab to practice.

+ Linking research directly to real-world application

Promising research can stall without practical application. HICB eliminates this barrier by actively connecting knowledge institutions with businesses and healthcare providers, ensuring innovations swiftly reach clinical practice.

Direct connections with life science & health companies

The open and dynamic atmosphere of HICB fosters quick and efficient collaboration between academic institutions, start-ups, and multinational companies.

Living labs and pilot projects

Test and validate your innovations in real-world healthcare settings in partnership with healthcare providers such as the on-campus hospital Maasziekenhuis Pantein.

+ Access to shared R&D facilities

Research requires adaptable facilities. Health Innovation Campus Boxmeer provides shared access to modern labs and specialized testing environments designed to flexibly support your projects.

Customisable lab and test facilities

From flexible workspaces to shared research labs, HICB ensures facilities match your evolving research requirements.

Rapid transition from idea to practice

Speed up innovation cycles by linking your research directly with practical healthcare and technology partners at the campus.

Work and learning opportunities

The Health Innovation Campus integrates research with practical training, offering extensive work and learning spaces for students and researchers.

+ Education and talent development aligned with market needs

As the demand for specialised knowledge grows in a tightening labour market, Health Innovation Campus Boxmeer ensures knowledge institutions remain highly attractive to both students and professionals.

Engaging students through impactful projects

Real-world, collaborative projects with leading companies allow students to contribute directly to meaningful innovations that benefit society.

Attracting talent with dynamic learning environments

HICB offers a vibrant, multidisciplinary campus perfectly tailored to the interests and needs of students and researchers.

Specialised programmes for professionals

The campus supports continuous learning with specialised training in medical technology and digital health, equipping professionals with relevant skills.

+ An accessible, inspiring learning environment

Successful institutions understand the power of an inspiring workspace to attract and retain talent. Health Innovation Campus Boxmeer combines sustainability with a lush, green campus setting that promotes well-being and effective collaboration.

Dynamic community and collaboration

Campus layout and shared facilities encourage spontaneous interactions and productive teamwork.

Easily accessible

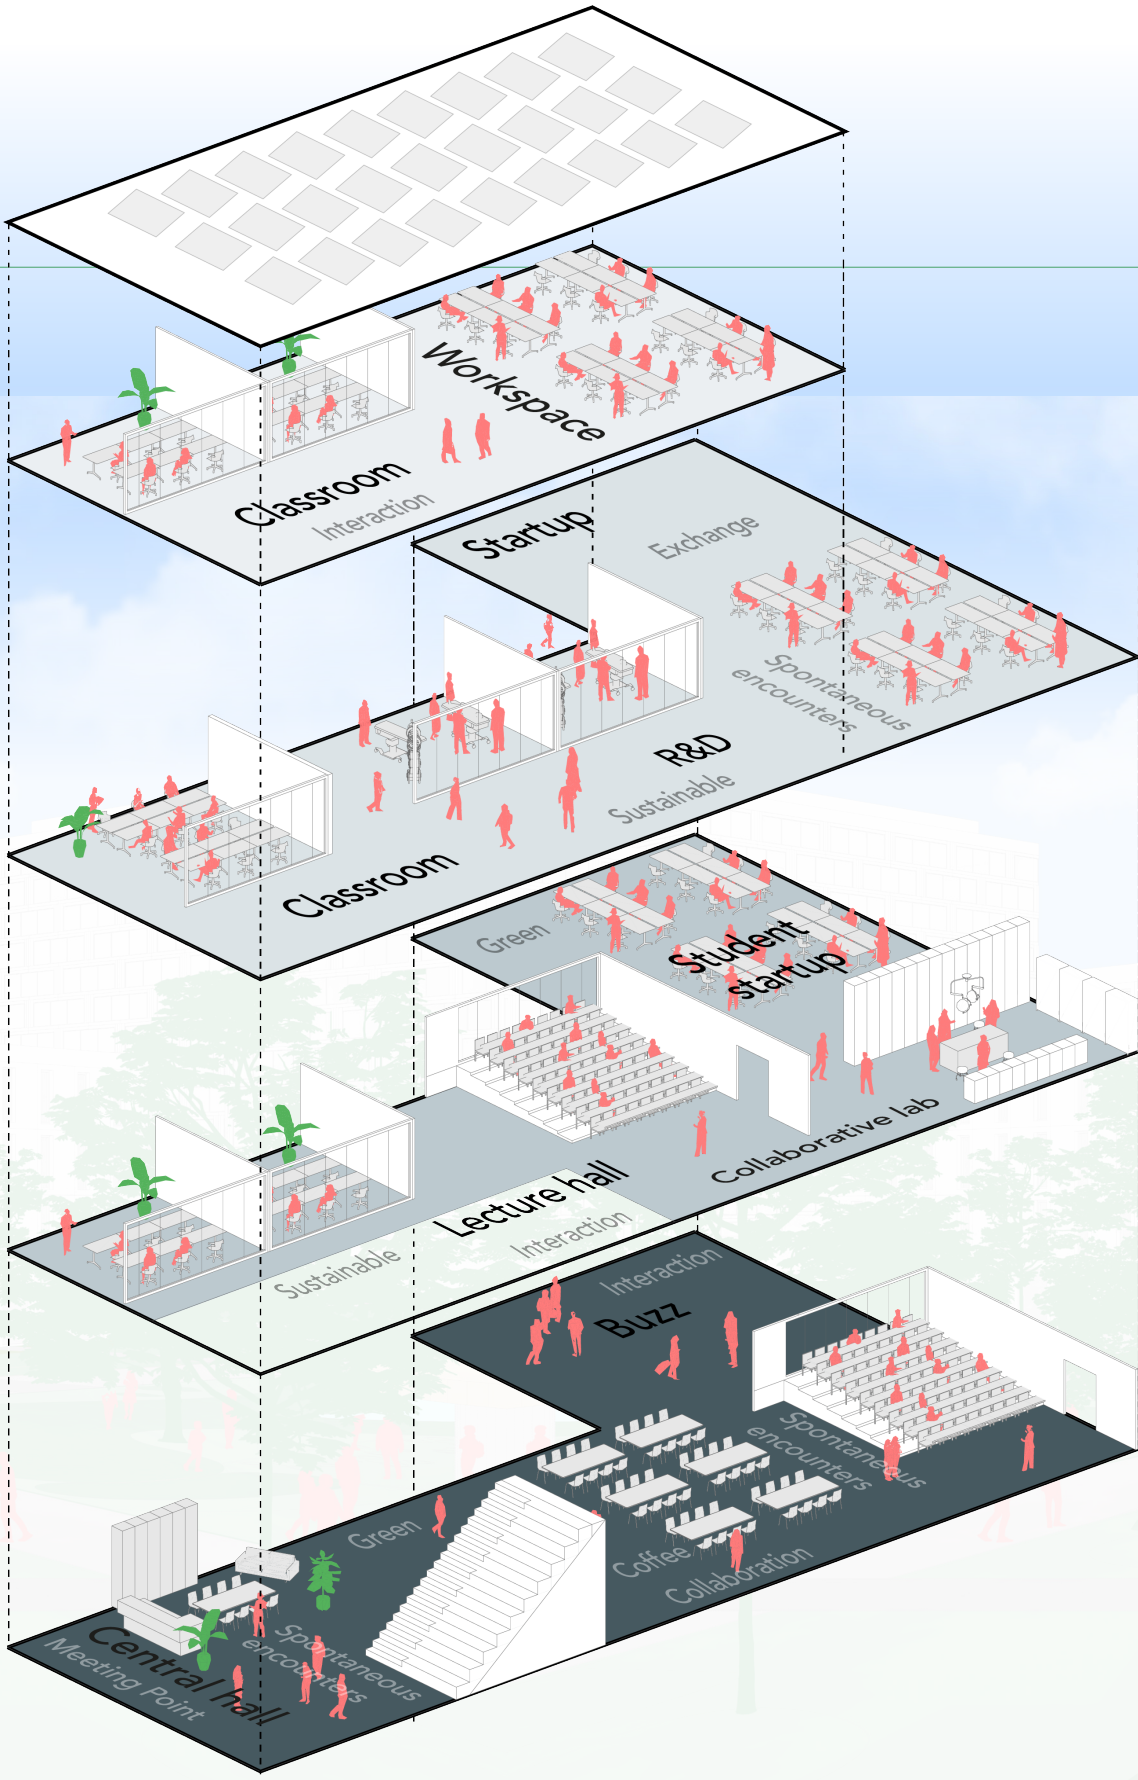

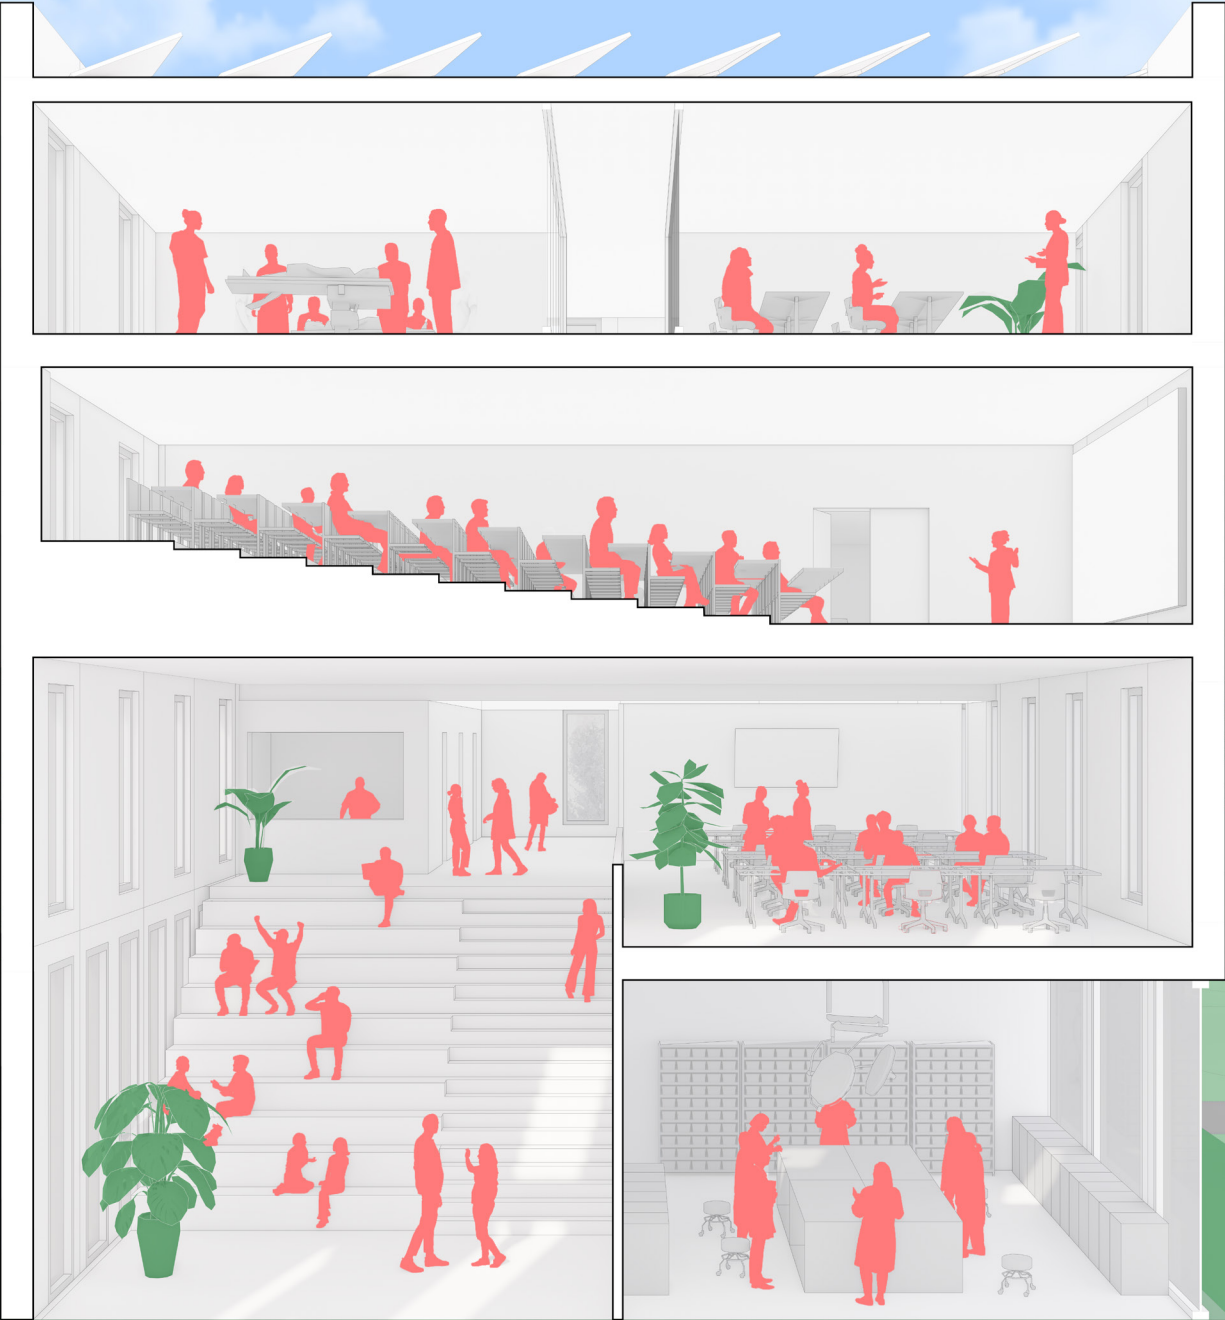

Strategically situated between prominent knowledge regions in The Netherlands, Belgium and Germany, HICB is conveniently reachable for students and researchers from across Europe.

Green, healthy working and study environment

A sustainably designed campus boosts well-being, inspiration, and productivity, benefiting both students and research staff.

An inspiring environment
designed for collaboration
and knowledge sharing to fuel
healthcare innovation.

To make a real impact, research needs the **right environment**. At Health Innovation Campus Boxmeer, **knowledge** is given the space to **make a difference**.
